

Parallel Curriculum Units for Mathematics, Grades 6-12

Maximize your mathematics curriculum to challenge all students. This collection of lessons from experienced teachers provides multifaceted examples of rigorous learning opportunities for mathematics students in Grades 6-12. The four sample units focus on fractions, linear programming, geometry, and quadratic relationships. The authors provide user-friendly methods for instruction and demonstrate how to differentiate the lessons for the benefit of all students. Included are standards-based strategies that guide students through:

- Understanding secondary mathematics concepts
- Discovering connections between mathematics and other subjects
- Developing critical thinking skills
- Connecting mathematics learning to society through the study of real-world data, proportional reasoning, and problem solving
