

## Native life in South India: being sketches of the social and religious characteristics of the Hindus

Although many books have been written on India some perhaps too abstract and philosophical, and others, on the other hand, too diffuse and cursory yet a short, popular account of the present-day manners and customs of the people of South India, such as readers in this country and those going out to that part might, perhaps, find useful on first arrival, seemed to be a desideratum. Having for upwards of eighteen years moved freely among all classes of the people in various parts of the country, and having taken notes of what I have seen and heard, I have ventured to put them together in this little book. Many of these pages, especially those on the manners and customs of the people, have been read over to an educated Brahmin gentleman of good family and position, who vouches for their general accuracy. For what has not come directly under my own observation I am indebted to other sources, especially to Dr. Cornish's invaluable Census Report. To all such I desire to express my obligations.
