

GUN CONTROL: Whats the answer?

Why is there such controversy about gun control? One side says, Guns dont kill people, people kill people. The other side believes that if no one had guns the world would be a much safer place. Who is right? In this little book of about 23,500-words, I look at the argument and see if either side is right and if not what the answer really is. Why am I qualified to write this book? I grew up in the fifties and sixties when the world was much different. Murder was almost not known in the towns and cities where I lived. Now anytime you turn on the local news, there has been a murder, an attempted murder or a robbery. I have also been an author and outdoor writer for many years. I have also owned and used many different types of firearms and have written about them. What I write in this book, however, will probably surprise many that read it. I know many will jump to the conclusion that since I own guns and have written about them, I will be biased. I can assure you that I will look at both sides and explain the good, the bad and the ugly of the issue. You cannot write about something that you do not know or understand. I have owned, tested, worked on and written about firearms. I have known people that were injured by them and people that were saved by them. Therefore, I will have some surprising insights as to why this is so controversial, what can be done to settle the question and what the future holds. How do I know what the future holds? Because, I have inside information as to what will happen if either side gets their wish. You may be shocked and surprised at what I am about to say. I am sure that some of what I say will offend a few people from both sides of the argument, but if they really want to know the answer, it will be here. It will be up to each person to look at what I say and then think about it. Many times when we first hear the truth, it shocks us or even makes us angry. However, if you really want to

know the truth about something you must look for it. And sometimes, it takes a while even after you find it, to understand that it is the correct answer. During the 1960s the world began to change and not for the better. As a freshman in high school, I remember that one of our teachers had a reloading press in his office. During his free time, he would reload high-powered rifle cartridges he used on his deer hunts out west. Another time a classmate brought me a handful of .22 shots shells to take home and try. In addition, as a senior, I could buy .22 cartridges at a local hardware store if the sales clerk called my father and asked if it was all right. Just a couple of years later, however, things had changed. When I was in the United States army on active duty, I could not buy a box of .22 rimfire ammunition at home while on leave! I could not even legally buy a BB cap because I was not twenty-one. My father would have to buy it for me. Why the change? I was a married man and had a child on the way. I was serving my country during a time of war. Every day I was using an M-16, throwing hand grenades, being trained to fire million dollar Hawk Missiles at aircraft, yet I could not buy a tiny round of ammunition to shoot at a paper target. This seems ludicrous and was. This is just one thing that happens when people make laws without thinking everything through. This all started for a variety of reasons, which I will explain later.
