

Education Resource Superbook Book 3. Ed. Industry-Reference-Products-Software-Job Guide

The education industry is a huge industry. Governments spend loads of money on it. Everybody goes to school to try to better their lives. There are loads of educational products on the market all the way from software to essays for sale. There are some miscellaneous education ideas like clip art, educational videos, shareware, etc. There's a big load of education websites in this book in the Education Websites Master List section. There is a list of education websites for each of the 50 states of the United States of America. I take a stab at listing some of the many nonteaching jobs within the field of education and provide websites for the eleven categories I came up with: Nonteaching Education Job Websites Education Administration Job Websites Education Manager Job Websites Education Government Job Websites Education Industry Job Websites Education Book Publishing Job Websites Educational Software Job Websites Tutor Job Websites Education-School-Career Counseling Job Websites Educational Consultant Job Websites Think Tank Websites for Jobs This book is for anybody within the field of education, all the professionals, teachers parents and students looking for a framework for this entity we call EDUCATION, LEARNING or SCHOOL. Its also for anyone within the industry looking for business or a job because its got education websites and resources that dont exist anywhere else in a single book.
