

Write an Outstanding Paper: In Fifteen Fast and Easy Micro-steps

This book is tailored to help you streamline the paper-writing process so that you will have time left over to accomplish the things that are meaningful to you. Within these pages, you will discover a unique method to make your papers more readable than those of your classmates. While this book addresses college-level students that may need to crank out five or six papers per semester, this method can be used by anyone old enough to take notes and organize their thoughts. It may be especially helpful to teachers or homeschool parents that wish to assign research papers to students without overwhelming them. This book breaks the paper-writing process down into fifteen easy-to-follow steps. Each of these steps can be accomplished quickly. This book is full of tips to make your life easier while trying to earn your degree. Once you start writing papers this way, you will never look back. The chapters in this book will give you the information you need to streamline the note-taking process, make the best use of print and internet sources, spend very little time in the library, and best of all, write a paper that doesn't seem like a paraphrased version of your original sources. You will enjoy the writing process much better if you don't have to labor over every individual sentence, and your professor will appreciate reading a paper that doesn't sound contrived.
