

## Science, PE, & Me!: Integrating Science and Fitness Concepts in Physically Active Complete Lessons for Elementary Children: Grade 3 (The Science of Healthful Living Book 2)

Science, PE, & Me! is a innovative approach to 3rd, 4th and 5th grade physical education. Children examine the effects of physical activity on their bodies in physically active physical education lessons. The integrated physical education and science education curriculum was funded by a \$1.5 million grant from the National Institutes of Health and designed by master teachers in physical education and science education. It exemplifies the sound mind in a sound body approach to physical education. Student achievement of fitness and science concepts was tested in a randomized clinical trial with 30 urban elementary schools. Students demonstrated statistically significant increases in knowledge concepts in every unit in every grade. The Teachers Manual for each grade consists of 30 very detailed lessons in three units, Dr. Loves Healthy Heart, Mickey's Mighty Muscles, and Flex Coolbodys Fitness Club. Together these units provide students with an opportunity to learn about the five fitness components and the fitness concepts of overload, progression, specificity, and FITT. Lessons are sequenced across units and across grades to increase student learning of fitness concepts. Student Journals (workbooks) accompany every lesson to reinforce the concepts in each lesson. Students use their journals to predict and collect data as they participate, analyze and graph data, and communicate their findings to others. Teacher Resources include a detailed 120-page activity directory with directions and set up for every physical activity. Graphics designers created charts, posters, and activity cards to help teachers convey the concepts to students. A Teachers Encyclopedia helps teachers with the fitness and science concepts. Family Science Activity Night is a school-community event in which children invite their families to school to participate in eight physically activity experiments

they have completed in physical education. The included Family Lab Notebook provides an opportunity for each family member to enter their data from each experiment and to discuss the effects of exercise and good nutrition on their bodies. There are handy directions for teachers to help with event set-up. WHATS INCLUDED? Chap 1: Science, PE, & Me! Guidelines and tips for teachers (How to use this curriculum) Teachers Manual Chapter 2: Dr. Loves Healthy Heart (10 lessons) Chapter 3: Mickey's Mighty Muscles (10 lessons) Chapter 4: Flex Coolbody's Fitness Club (10 lessons) Student Science/Physical Education Journal (1 entry /lesson) Teacher Resources Activity Directory Encyclopedia Equipment Lists Charts & Posters Vocabulary Validated Knowledge Tests and Testing Manual Matrices Summary of National Standards Science Education Essential Questions, Objectives in Each Lesson Science, PE, & Me! is a versatile set of units and lessons that can be used as a complete physical education curriculum. Classroom teachers can use the lessons to supplement life science body systems content and to engage students in scientific inquiry with physically active lessons. After-school teachers will find the detailed lessons easy to teach and a perfect enrichment activity.
