

6th Grade Math - Parent Edition

TestSoups Parent Guide to 6th Grade has been specifically designed to support parents as they work with their students on challenging math skills. The resources we have compiled into this Parent Guide have been designed to help parents understand what students are learning at school and how to best help them at home. 6th Grade Math can be tough, let us work with you to develop a strong understanding of what is expected from your students with these new standards and skills! ~Premium Content~ Our eBook Study Guide helps you practice and master the 6th grade math skills. This study guide has been designed specifically for 6th grade students so that you can use this as a resource independently, for extra support and practice in math. It includes:

- *Mini-lessons for each skill with a sample problem.
- *Practice questions and fully explained, easy to follow answers
- *Overviews of each skill that will tell you what you will be learning, important vocabulary, and practice problems for that skill.
- ~Superior User Interface~
- *Bookmark pages you want to revisit
- *Make notes with our easy-to-use annotations tool
- *Highlight important passages or questions with our highlight tool
- *Adjust font size
- *Skip to the last page read, or navigate using our table of contents
- ~Content Outline~ Lessons, vocabulary, practice problems & explanations, as well as a description of what you can expect, for each of the following:

- Expressions & Equations-
- *Creating & solving expressions with whole number exponents
- *Creating & solving expressions based on written descriptions
- *Creating equivalent expressions
- *Identifying equivalent expressions
- *Creating expressions using variables to represent unknown numbers in word problems
- *Solving equations & inequalities
- *Using variables to write & solve equations for real world situations
- *Writing inequalities to represent real life

situations *Determining relationships between variables in order to solve word problems -Geometry- *Finding the area of polygons *Finding the area of right rectangular prisms *Drawing polygons in a coordinate plane *Using 2D nets to represent 3D shapes & find surface area -The Number System- *Dividing fractions *Multiplying multi-digit numbers *Adding, subtracting, multiplying & dividing decimals *Finding greatest common factors and least common multiples *Using positive & negative numbers to represent opposite values or directions *Rational numbers as part of the number line *Ordering & absolute value of positive & negative numbers *Finding the distance between 2 points on a coordinate plane -Ratios & Proportions- *Understanding ratios & using them to describe relationships *Using unit rates to describe relationships between 2 quantities *Using ratios to solve real world problems -Statistics & Probability- *Identifying & creating statistical questions *Describing the distribution of data with center, spread, or overall shape *Describing the distribution of data with measures of center and measures of variability *Recognizing & generating graphs to represent statistical data *Summarizing data sets in relation to the question asked
