

Biochemical Experimental Technology National Planning Textbook for Regular Higher Education During the 11th Five-year Plan (Textbook for Higher Vocational Education) (Chinese Edition)

The 21st century is the age of life science. In face of developing and ever-changing biochemical detection technology, the book introduces basic principle, rudimentary knowledge and basic skills; infuses scientific, advanced and instructive new practical technologies; and organizes contents based on biochemical knowledge and skills in accordance with demands of the times for specialized technical talents. Biochemical detection technology is a bridge to connect biochemical theories and social practice. The book aims to foster students operating skills and basic technical quality in terms of experiment design, comprehensive use of knowledge, macro thinking as well as the ability to analyze problems in a dialectic way.
