

Working With Percents, Book 5 (Basic Computation Series 2000)

Basic Computation Series This 10-book teacher resource series is designed to provide comprehensive practice in essential computational skills including fractions, decimals, measurement, perimeter, and area with carefully sequenced reproducible worksheets. These books are ideal for students who have not achieved computational proficiency. Interest Level: 6-12 Increases standardized test success through practice on quizzes, semester tests, and year-end tests. Includes explanatory material designed to help students, parents, and teachers understand the material in the section and its purpose. Provides quizzes for weekly check-ups, review, extra practice, and skill maintenance
