

The Children of the Curative Education Course

The Children of the Curative Education Course offers seventeen detailed case studies of children with special needs, dating back to the early twentieth century. It presents the clinical and social background of each child, as well as describing their interactions with Rudolf Steiner. Uhlenhoff documents Steiners recommendations related to medication, therapeutic eurythmy, and other educational therapies. He then traces their progress over the following months and years. With great warmth and meaningful anecdotes, Uhlenhoff describes in great detail the development of each child.
