

# The Welsh Answering System (Trends in Linguistics. Studies and Monographs [Tilsm])

This book researches the various ways of saying yes and no in Welsh. In many languages, responding with yes or no is simple. This work shows that in Welsh a variety of forms can be used, depending upon syntax, morphology, lexis and semantics. The work will appeal to scholars of various interests: the chapters which analyse the answering system provide interesting data for theorists and comparative linguists; the chapters which describe and attempt to explain variation will be of interest to sociolinguists; and, of course, the whole work will appeal to Celticists.
