

# The English Noun Phrase: The Nature of Linguistic Categorization (Studies in English Language)

English has an interesting variety of noun phrases, which differ greatly in structure. Examples are binominal (two-noun) phrases (a beast of a party); possessive constructions (the authors opinion); and discontinuous noun phrases (the review [came out yesterday] of his book). How are these different noun phrases structured? How do we produce and understand them? These questions are central to this 2007 study, which explores the interaction between the form of noun phrases, their meaning, and their use. It shows how, despite the need in linguistic analysis for strict categories, many linguistic constructions in fact defy straightforward classification - and concludes that in order to fully explain the internal structure of utterances, we must first consider the communicative, pragmatic and cognitive factors that come into play. Drawing on a range of authentic examples, this book sheds light not only on the noun phrase itself but also the nature of linguistic classification.
