

Antique Gems and Rings, Vol. 2: Illustrations (Classic Reprint)

Excerpt from *Antique Gems and Rings, Vol. 2: Illustrations* The history of the first invention of the glyptic art receives considerable light from our learning the processes followed by tribes still in a state of nature for reducing hard stones into various articles of ornament or utility. Mans instinct usually leads him, under the same conditions, to resort to the same means for effecting a certain given purpose, and to producing the same forms; nevertheless, one cannot help being surprised at finding the primaeval Assyrian and the Indian of the Amazon equally adopting the cylinder as the badge of distinction, and fashioning it, in the same way, out of the most intractable substance within their reach. But the whole of the subject is so full of interest, as well as of special information, that I have thought I am doing a service to my readers by bringing together whatever recent travellers have made known respecting it, as observed by them either in the remains of savage art, or in its actual practice at the present day.
