

Social Policy and Social Work: From an International Development Perspective (European Perspectives on Social Development. Social Policy and Social Work)

The present social policy and social work are facing with and challenging the process of rapid change in all aspects of social life: economic, cultural and political. The globalising capitalistic economy is considered to be the main cause of this process and it is made responsible for reduction of the public sphere, for the demise of the welfare state, for growing poverty and social inequalities, for damage of the local communities and families, for degradation of the environment. There is no doubt social policy and social work has to rise to these challenges. This volume contains some interesting contributions to this question provided by international experts.
