

Race and College Admissions: A Case for Affirmative Action

Affirmative action was meant to redress the lingering vestiges of the discrimination and exclusion so prominent in Americas past and afford underrepresented groups the opportunities most take for granted. Its impact on higher learning has been immeasurable: diversity is part of the mission of most colleges and universities, and exposure to a variety of ethnicities, cultures and perspectives benefits all. courts mandate colorblind admissions and affirmative action is misconstrued and attacked as reverse discrimination, patronizing and insulting to minorities, or simply unnecessary. Diversity has plummeted on many campuses as a result, and elite institutions now struggle to enroll underrepresented groups. Discussions of the controversy reflect little understanding of the role of race in college admissions, ignore the fact that eligibility does not guarantee admission, and falsely cast affirmative action as a policy based on race alone. misconceptions surrounding affirmative action and the place of race in the admission process. Chapters explore declining diversity; the effect upon professional schools; the historical perspective of the subject; the courts role in affirmative action; inequities in the admissions process; percentage plans as an alternative; the detrimental results of colorblind admissions; and ways to address the problem.
