

Relationship Skills in Social Work

This book considers the place of relationships in current practice and explores the ways in which social workers can use relationship skills to achieve the best possible outcomes for their clients. The book also offers a unique discussion of the social workers relationship with him or herself, arguing that self-awareness is as essential to good practice as an emotional understanding of the other. In doing so, the book promotes a new model for relationship-based social work, which emphasizes the importance of both the inter- and intrapersonal. Using reflective exercises and case studies, the book encourages students to relate the tools they have learnt to practice scenarios from the real world, and is essential reading for all qualifying social work students.
