Excerpt from Elements of Mythology: Or, Classical Fables of the Greeks and Romans; To Which Are Added Some Notices of Syrian, Hindu, and Scandinavian Superstitions, Together With Those of the American Nations This book of Education is one of a series of simple and easy works for the use of schools. It may appear to have less of the character of utility than its predecessors; but the object of them all, humble and merely elementary as they are, is to raise the mind above mere utility, not only to employ the faculties of the young upon what is necessary to be known, but to elevate them to the love and enjoyment of the beautiful, in nature, in art, and in literature - to inspire a taste for the luxuries and refinements of Intellect - to make this understand prose, and take delight in poetry - to discipline the reason, and excite the imagination. I know that the stories of heathen gods and goddesses are somewhat out of date - that recent poetry derives its greatest power from sentiment, from delineations of the human heart, from external nature, and from genuine history. But we must preserve our old poetry, and its connexion with the fine arts, and with the fictions and superstitions of other ages and countries.
