

Re-Designing Learning Contexts: Technology-Rich, Learner-Centred Ecologies (Foundations and Futures of Education)

What do we mean by the word context in education and how does our context influence the way that we learn? What role can technology play in enhancing learning and what is the future of technology within learning? Re-Designing Learning Contexts seeks to re-dress the lack of attention that has traditionally been paid to a learners wider context and proposes a model to help educators and technologists develop more productive learning contexts. It defines context as the interactions between the learner and a set of inter-related resource elements that are not tied to a physical or virtual location. Context is something that belongs to an individual and that is created through their interactions in the world. Based on original, empirical research, the book considers the intersection between learning, context and technology, and explores: the meaning of the concept of context and its relationship to learning the ways in which different types of technology can scaffold learning in context the Learner-Centric Ecology of Resources model of context as a framework for designing technology-rich learning environments the importance of matching available resources to each learners particular needs the ways in which the learners environment and the technologies available might change over the coming years the potential impact of recent technological developments within computer science and artificial intelligence. This interdisciplinary study draws on a range of disciplines, including geography, anthropology, psychology, education and computing, to investigate the dynamics and potential of teacher-learner interaction within a learning continuum, and across a variety of locations. It will be of interest to those teaching, researching and thinking about the use of technology in learning and pedagogy, as well as those involved in developing technology for education and those who use it in their own teaching. For

practical examples of the way the Ecology of Resources framework has been used visit: <http://eorframework.pbworks.com>.

Re-designing Learning Contexts: Technology-rich, Learner-centred Context matters to learning it is complex and local to a learner. The Ecology of Resources represents learners holistically with respect to the interactions that The Ecology of Resources model also acts as the foundation for a design framework technologists and educational practitioners to design technology-rich. **Foundations and Futures of Education - Routledge** This pdf ebook is one of
