

African American Art of War

The specific purpose of the Art of War is to move the minds of Black people away from western culture and values where we have become the consequence and outcome of domination and the cultural offspring of European decay. To move us away from the self destructive attitudes where we witness our children routinely snatched from our collective arms and while far too many others are housed and rot away in cages. The resurrection of our tradition is the predictable paradigm that all of our children need because it is what centers and fosters the best of who we are as it was crafted by our fathers and mothers for our success.
