

Beyond A-levels: Curriculum 2000 and the Reform of 14-19 Qualifications (The Future of Education from 14+)

Since its introduction over 50 years ago, the A-level has been a constant subject of debate in schools, HE and government. Sometimes hailed as a gold standard, there is now intense speculation about the future of the A-level in particular, but also about post-14 qualifications in general. The furore about quality and standards which accompanies each years A-level results has become an annual fixture in the UK press calendar. With the introduction of Curriculum 2000, and an increasing number of calls for Bacculaureate-style examinations, vocational qualifications and more, the need for serious debate - and change in this field is clear. Based on primary research by two of the leading commentators on the qualifications, this book is a wide-ranging and critical view of the fundamental approaches of the education system in Britain today. With government action on this subject looking inevitable, this will be a challenging and important book for anyone interested in this debate.
