

Nature and Narrative: An Introduction to the New Philosophy of Psychiatry (International Perspectives in Philosophy and Psychiatry)

Nature and Narrative is the launch volume in a new series of books entitled International Perspectives in Philosophy and Psychiatry. The series will aim to build links between the sciences and humanities in psychiatry. Our ability to decipher mental disorders depends to a unique extent on both the sciences and the humanities, science provides insight into the causes of a problem, enabling us to formulate an explanation, and the humanities provides insight into its meanings and helps with our understanding. Psychiatry, if it to develop as a balanced discipline, must draw on input from both of these spheres. Nature (for causes) and Narrative (for meanings) will help define the series as a whole by touching on range of issues relevant to this border country. With contributions from an international star-studded cast, representing the field of psychiatry, psychology and philosophy, this volume will set the scene for this new interdisciplinary field. This will be of interest to all members of the mental health team as well as to philosophers, social scientists, and bioethicists.
