

ICT usage and students study habits in Nigerian universities

This work provides an invaluable study of one of the crucial areas in library and information science today. Success in school is not so much determined by sheer intelligence as knowing how to study; being successful in school requires effective study habits. Efficient and successful study consists of more than just memorizing facts but calls for knowing where and how to obtain information and the capacity to make excellent use of it. Successful completion of university education has always been the concern of students, parents, lecturers and the government. This work on information and communication technology (ICT) usage and students study habits in universities in Cross River State, Nigeria discusses the problem at a time when ICT is posed as solution to wide range of problems in library and information world.
