

Social Behaviour and Network Therapy for Alcohol Problems

Highly Commended in the Psychiatry category at the 2010 BMA Medical Books Awards! This book serves as a manual for clinicians working with people with alcohol problems. The manual is based on previous research in addiction treatment, including family and social network interventions, as well as the authors' own work developing and evaluating Social Behaviour and Network Therapy (SBNT) for example in the United Kingdom Alcohol Treatment Trial (UKATT). Containing a range of ideas the book is guided by a key principle: the development of social support for a positive change in drinking behaviour. Divided into three sections topics include: an introduction to the evidence base underpinning SBNT; core components of the treatment; common questions asked about the intervention. Featuring a series of practical handouts, this book will be essential reading for clinicians, counsellors, nurses, psychologists and all those involved in the treatment of alcohol misuse and dependence.
