

Survey of Library Furniture Acquisition Practices

The Survey of Library Furniture Acquisitions Practices gives highly detailed data for public and academic libraries on their furniture purchasing policies including use of consortium purchases, online purchases, use of auctions and buying and selling of used furniture. The study gives highly detailed data on product choices, views on favored vendors, sources of information on best deals, and the impact of design, price, safety, durability, environmental impact and other considerations in the purchase decision. Survey participants tell of their best furniture purchases, and what they look for in a vendor of particular types of furniture. The survey gives data on buying plans for a broad range of furniture types including childrens furniture, carrels, wall hangings, flooring and carpeting, shelves, desks, computer-related furniture and many other types of library furniture. Data is broken out for public and academic libraries and by library overall budget and furniture budget. The study is designed to help librarians answer questions such as: where do I find the best possible furniture and the best possible price? What are our peers buying and what are they satisfied with?
