

Studies in the Arthurian Legend (Classic Reprint)

My chief object in the following pages is to make Welsh literature help to shed light on the Arthurian Legend; and that term is here construed loosely, so as to include other legends more or less closely associated with Arthur. Most of the following chapters arose out of my Hibbert Lectures on Celtic Heathendom, which were delivered in the year 1886. In consequence of that origin they take for granted the same views, in the main, as to Arthurian mythology. It is hoped, however, that the reader who disapproves of those views, will not regard me as now perpetrating a fresh offence, though I have been obliged to continue the use of some of the terms of the Solar Myth Theory. They are so convenient; and whatever may eventually happen to that theory, nothing has yet been found exactly to take its place. Nevertheless, we are possibly on the eve of a revolution in respect of mythological questions, as Mr. Frazer's Golden Bough seems to indicate. (Typographical errors above are due to OCR software and do not occur in the book.)
