

Contemporary Television Series: Narrative Structures and Audience Perception

Contemporary Television Series: Narrative Structures and Audience Perception proposes an interdisciplinary and multicultural approach of old concepts like fiction, reality and narrativity applied to actual worldwide television series. The authors that have contributed to this volume analyze the almost invisible barriers between fiction and reality in television series from different perspectives. The results of their studies are extremely interesting and revealing. The new perspectives offered by this volume will be of great interest to any scholar of European and international studies, because they bring to light new ideas, new methodologies and results that could be further developed. This volume allows readers to explore these unique insights, even if they are not senior researchers, and to easily digest the content, and also to acknowledge the impact of the viewing of television series on reality and on their own lives.
