

# Fairy Tales With a Black Consciousness: Essays on Adaptations of Familiar Stories

The all new essays in this book discuss Black cultural retellings of traditional, European fairy tales. The representation of Black protagonists in such tales helps to shape childrens ideas about themselves and the world beyond--which can ignite a will to read books representing diverse characters. The need for a multicultural text set which includes the multiplicity of cultures within the Black diaspora is discussed. The tales referenced in the text are rich in perspective: they are such as Aesops fables, Cinderella, Rapunzel and Ananse. Readers will see that stories from Black perspectives adhere to the dictates of traditional literary conventions while still steeped in literary traditions traceable to Africa or the diaspora.
