

Chemistry Combination-Inorganic chemistry (national demonstration higher vocational education institutions construction project achievement series) (Chinese Edition)

The book includes two parts: the first part is about study unit, emphasizing introducing chemical reaction rate and chemical equilibrium, electrolyte solution and precipitation-dissolution equilibrium, atomic structure and periodic system of elements and molecular architecture, oxidation reduction reaction, complex compound, non-metallic element and main transition element. The second part is about experiment unit. The book totally lists 12 experiments with strong pertinence, simple operation and good experiment result as training project. Contents have wide coverage and are helpful for expanding scope of knowledge of students.
