

The Secret of Academic Excellence

Education is one of life's major quintessence, an indispensable companion and a timeless tool. Consequently, the innate desire of every student is to excel, to become the pride and joy of all and sundry both within the family and the community at large. And considering the mental, financial and time input, nothing less than excellence is worthy. However, as sincere as many are in their academic pursuits burning the midnight oil, spending hours in the library/lecture hall and fulfilling other forms of intellectual rigours they still finish with poor or unsatisfactory results. Others even go behind the scene in search of short-cuts yet their end never justifies the means. I believed I could excel. I realised that not everybody was failing so I sought desperately for the secrets that made others excel academically and to God's glory I found them. At first, it seemed as if it was luck but when the results kept on coming, it became clear that I knew something that others did not and was doing something others were not. At first I struggled academically but I did not give up. My improved performance encouraged me to work smarter and harder, so much so that within a short space of time, it earned me the respect of teachers/lecturers, the admiration of friends/colleagues and the confidence and self-worth that have helped me to date. This book will do the same for you.
