

Using Childrens Literature to Learn about Disabilities and Illness

Dr. Blaska was concerned that books with characters with disabilities and illnesses were not being incorporated into the curricula in early childhood programs. During a sabbatical she researched this genre of literature, locating books and outlining strategies on how to use the books. She incorporated her research findings into the volume, and this newly revised edition updates these strategies. The book is designed for parents and early childhood professionals to help young children (birth through third grade) learn about disabilities and illnesses through childrens literature, and allow all children to have the opportunity to learn about diversity of ability much like they learn about cultural diversity.
