

Traditions, Superstitions, and Folklore, (Chiefly Lancashire and the North of England:) Their (Classic Reprint)

Our nursery legends and popular superstitions are fast becoming matters of history, except in the more remote and secluded portions of the country. The age of the steam engine, and the electric battery, and the many other practical adaptations of the triumphs of physical science, is apparently not the one in which such waifs and strays from the mythical lore of the dim and distant Past are very likely to be much sought after or honoured. But now that the light of modern investigation, and especially that ray furnished by recent discoveries in philological science, has been directed towards their deeper and more hidden mysteries, profound philosophical historians have begun to discover that from this apparently desolate literary region much reliable knowledge may be extracted, leading to conclusions of the most interesting and important kind, with reference to the early history of our race. The labours of the brothers Grimm, Dr. Adalbert Kuhn, Professor Max Müller, the Rev. G. W. Cox, and others, have recently received considerable attention from philosophic enquirers into the origin and early development of the people from whom nearly all of the European, and some of the Asiatic, modern nationalities have sprung. (Typographical errors above are due to OCR software and do not occur in the book.)
