

# Structure and Agency in the Neoliberal University (Routledge Research in Education)

This volume considers how current transitions in postsecondary education are impacting Higher Education (HE) institutions and subjects in a number of Northern nations, as well as how these transitions are indicative of the watershed from the welfare to the market state. The university is now considered a key site for training and wealth generation in the so-called knowledge economy that operates in a globalising, high tech world. Further, these transitions are underpinned by neo-liberal economic ideas that assume that the public sector is a drag on the economy unless it is subject to the rules, regulations and assumptions that govern the private sector. This excellent volume - an important contribution to Education as well as Economics and Politics - furthers our understandings of universities as marketable entities as part of the globalized economy.
