

The Heros Quest and the Cycles of Nature: An Ecological Interpretation of World Mythology

This examination of the heroic journey in world mythology casts the protagonist as a personification of nature--a botanical hero one might say--who begins the quest in a metaphorical seed-like state, then sprouting into a period of verdant strength. But the hero must face a mythic underworld where he or she contends with mortality and sacrifice--embracing death as a part of life. For centuries, humans have sought superiority over nature. Yet the botanical hero finds nothing is lost by recognizing that one is merely a part of nature. Instead, a cyclical promise of continuous life is realized, in which no element fully disappears, and the heros message is not to dwell on death.
