

Moral Education (Heritage)

This volume, based on an interdisciplinary conference of psychologists, sociologists, philosophers, and social scientists, explores a topic of vital importance today---moral education. The book is organized around four questions: the nature and scope of moral education, the problem of ethical pluralism, psychological considerations in a program of moral education, and the social structure of the school as it relates to moral education. This volume will interest philosophers and social scientists concerned with human behaviour and values. It will be of special interest to those engaged in educational research, to curriculum planners, and teachers.
