

Social Work Practice with Children and Adolescents

This text identifies factors that influence children and adolescents and indicates how professionals can help young people as clients in a variety of settings. The strengths of the text include a pragmatic focus on both children and adolescents, a broad conception of practice, an emphasis on assessment, the use of historical, organizational, and developmental perspectives, and a major social problems focus. The text is divided into three parts to identify the context of social work with children and adolescents, examine the helping process, and discuss applications of that process.
