

Danger on the Highway

Danger on the Highway is a guide for motorists and highway officials concerned with improving highway safety. It details The Sandy Johnson Foundation Highway Safety Initiative and explains how a slight modification in the thinking of motorists and highway officials could potentially save 10s of thousands of lives across the country, annually. In addition, implementation of this program could save individual state governments millions of dollars each year in unnecessary time delays and un-warranted construction. The program was developed by Dean Johnson after he performed an investigation into the cause of the automobile crash that killed his wife Sandy. Applying the same principles he used to determine the cause of that crash, Mr. Johnson discovered that other dangerous locations could be identified, analyzed and corrected with the same positive results. This book is a **MUST READ** for all motorists and highway officials.
