

A Renaissance in Education: Creating a Wiser, Healthier and Less Violent World

As our schools go, so goes our society. We all know this to be true, but we have been living this credo in reverse, passing on what our society is instead of what can be. With this confused pattern of thought, social ills not only repeat, they increase in frequency and magnitude. A Renaissance in Education illuminates an emerging worldwide rebirth and introduces our society to a proven, more effective educational design that not only changes our schools but in turn transforms our communities. With true education schools create the impetus for positive social change instead of serving as an end-point for social disintegration. A Renaissance in Education explores aspects of our childrens lives that touch peoples hearts, regardless of country or culture. Life educationauthor Ron Verondas specialtyaffects anyone wanting to find peace, happiness or love in life. Where authors addressing educational changes have pointed out the errors of our school system they often have done so by pointing fingers and laying blame. A Renaissance in Education points out the sense of how we got to where we are, and more importantly what to do about it. Author Ron Veronda offers creative lessons for teaching mindful awareness as well as examples of life lessons that can be used by children and adults to help get beyond the ego and the false sense of who we are.
