

Rough Stone Monuments and Their Builders (Classic Reprint)

Excerpt from Rough Stone Monuments and Their Builders
The aim of this volume is to enable those who are Stonehenge and other great stone monuments of England to learn something of the similar buildings which exist in different parts of the world, of the men who constructed them, and of the great arch?ological system of which they form a part. It is hoped that to the arch?ologist it may be useful as a complete though brief sketch of our present knowledge of the megalithic monuments, and as a short treatment of the problems which arise in connection with them. To British readers it is unnecessary to give any justification for the comparatively full treatment accorded to the monuments of Great Britain and Ireland. Malta and Sardinia may perhaps seem to occupy more than their due share of space, but the usurpation is justified by the magnificence and the intrinsic interest of their megalithic buildings.
