

Designing a Market Basket for NAEP: Summary of a Workshop

At the request of the U.S. Department of Education, the National Research Council (NRC) established the Committee on NAEP Reporting Practices to examine the feasibility and potential impact of district-level and market-basket reporting practices. As part of its charge, the committee sponsored a workshop in February 2000 to gather information on issues related to market-basket reporting for the National Assessment of Education Progress (NAEP). *Designing a Market Basket for NAEP: Summary of a Workshop* explores with various stakeholders their interest in and perceptions regarding the desirability, feasibility, and potential impact of market-basket reporting for the NAEP. The market-basket concept is based on the idea that a relatively limited set of items can represent some larger construct. The general idea of a NAEP market basket is based on an image of a collection of test questions representative of some larger content domain and an easily understood index to summarize performance on the items.
