

The Creative Lifelong Learning Formula: Building Global Partnerships for a Sustainable World (The Creative Learning Series Book 13)

Welcome to The Creative Lifelong Learning Formula, which includes the key elements of Creative Lifelong Learning from the twelve books of The Creative Learning Series, as well as the tools and techniques for Creative Action Planning, which are currently only available as individual E-Learning projects. Do you want to live with purpose and passion? Do you dream of being more courageous and adventurous? The Creative Lifelong Learning Formula is all about making the most of your life, developing your gifts and talents and making a difference in the world. Creative Lifelong Learning is an adventure which never ends. All you have to do is decide to begin the Learning Journey, and set off in a direction which interests you. You can change direction as often as you choose, and it is best if you do. As you progress in your life, new challenges will present themselves, and the Creative Formula gives you the courage and commitment to stay the course. The Creative Formula - $P=K+M+D$ We are concerned here with how we can progress, as individuals and as a world-wide community, and the formula which I propose is a very simple one, involving three core values for wise human development: Progress = Kindness + Mindfulness + Democracy To understand the importance of the core values of Kindness, Mindfulness and Democracy, it helps to consider their opposites: Cruelty is the opposite of Kindness Thoughtlessness is the opposite of Mindfulness Dictatorship is the opposite of Democracy Think of a world where cruelty, thoughtless and dictatorship hold sway and you will be imagining the destructive conditions under which large numbers of the Worlds population currently live. Empowering people to stand up to cruelty and thoughtlessness, to have a say in how their leaders behave, and to become self-determining and secure is

what this formula and the Creative Lifelong Learning Process is about. In our modern world of rapid change and complexity, creativity and lifelong learning are necessities. As our world population rises, we have become conscious that the resources of our planet are not infinite. We know that we will have to change the way we go about things if we are to survive and thrive in the future, and the United Nations Sustainable Development Targets 2015-2030 are designed to tackle this issue.

Here, you will discover how you can design your own Lifelong Learning pathway, create action plans to realize your potential, and become a partner to create a better world. The Creative Lifelong Learning Formula offers a range of creative strategies and action plans to move the process along, and the UN Global Goals offer a comprehensive blueprint to focus your energies to help create a better world for all of us.
