

Build Leadership Skills with Simulations

Use simulations to help yourself and others try out leadership skills! The simulations in this book are designed to strengthen and build the participants abilities to lead and problem solve in groups. A simulation must fit three criteria: 1. The people taking part are role-playing a scenario. It may or may not be based on a real scenario but no one is taking part in actual events. 2. Participation is active. People must make decisions and act on them. 3. Debriefing happens. The scenario must include a time when you stop pretending and analyze how the scenario played out. Get this book today to start using simulations to build leadership skills!
