

Learning from Comparing: New Directions in Comparative Educational Research. Volume 2: Policy, Professionals and Development (v. 2)

Learning from Comparing is a major two-volume study which reassesses the contribution of comparative educational research and theory to our understanding of contemporary educational problems and to our capacity to solve them. At a time when educational research is under attack on the grounds of bias and irrelevance, and under pressure to address only those questions which are acceptable politically (as good a definition of bias as any), this is a serious attempt to bridge the worlds of research, policy and practice. The editors have put together a collection - in terms of both perspective and nationality - which ensures contrasting viewpoints on each topic. CONTENTS: Robin Alexander. Preface. PART ONE.
