

Teutonic Legends: In the Nibelungen Lied and the Nibelungen Ring (Classic Reprint)

Excerpt from Teutonic Legends: In the Nibelungen Lied and the Nibelungen Ring Richard Wagners operas, based chiefly on the legends of Northern Europe, are discovering to our English-speaking people how little they know of the mythology of the race from which they are descended. Not only the lovers of music, but the students of folklore and of general literature, are thus stirred to the pursuit of the old myths which so illustrate the peculiarities of our race and the history of our moral development. Accordingly, we begin to feel that we are no more at liberty in our day to be ignorant of Siegfried and Parsifal than of Hercules and the divine Achilles. Moreover, it is very natural that in the era of athletics in education we should take increased interest in the old hero myths and epic songs, which glorify physical strength and moral courage.
