

Early Learning Rhythms and Rhymes Guidebook: Baby Time Rhymes (Volume 4)

This Guidebook is an accompaniment to the MeComplete! Early Learning Rhythms and Rhymes: BABY TIME RHYMES curricula set. It provides an overview of why rhythms, rhymes, finger plays and songs are an essential part of infant/toddler curriculum. This guide provides ways for each poster in the set to be used for young infants, mobile infants, and toddlers. In addition, it links the learning posters to learning goals for each age group as well as how they support the program in meeting ITERS (Infant Toddler Environmental Rating Scales) criteria. The accompanying posters can be purchased at www.earlylearninginnovationsllc.com.

The BABY TIME RHYMES set offers both traditional and new rhymes that are fun, engaging, and interactive in all the ways the traditional nursery rhymes have been. Traditional nursery rhymes have historically been a significant part of cultural and language learning within family, community, and educational contexts. The greatest benefit of traditional rhymes has always been that of learning language in fun and interactive ways. The cadence, sing-song rhythms, and patterns of words support mathematical learning of patterns. The actions and motions that accompany the rhymes support literacy in their representational symbolism. The shared joy and interaction of each rhythm or rhyme provides support for learning trust, self-concept, social awareness and communication patterns. In addition, nursery rhymes provide opportunities for many other learning objectives such as, number awareness, science, and social studies. We have carefully selected nursery rhymes that appeal to the youngest through simple verse and are interactive as well as fun and engaging for toddlers and combined with beautiful images and the printed word, supporting and engaging both the child and the teacher. This set, as with the other MeComplete Early Learning

Rhythms and Rhymes sets, support the growing child with various strategies to use each activity for infants, mobile infants, and toddlers.
