

Learn and Play Out: How to develop your primary schools outside space (David Fulton Books)

Do your children know how to grow potatoes, where to see a dragon-fly or how to fire a rocket? Are you one of the 82% of teachers who thinks their school isnt making as much use of their grounds as they should? Do you know how to make the most of your outdoor teaching and learning spaces? Learn and Play Out is an inspirational, accessible and pragmatic set of resources for making changes to Primary school playgrounds in order to provide high quality learning and play experiences. Drawing on Learning through Landscapes experience in working with thousands of primary schools, it provides practical support to improve the use, design and management of your outdoor area. More schools are seeing the benefits of their pupils spending longer periods of their school day outside, with research showing that this improves attainment, behaviour, motivation and self-esteem. For many schools however, the environment of their grounds does not meet the needs of their pupils. This toolkit helps them assess what they already have, work through what their needs are, and inspires them to take the next steps forward to make physical and practical improvements to their grounds. Featuring a CD ROM with a comprehensive and fully adaptable audit tool, plus activities and case study resources to support your work, the handy toolkit provides: An overview of what your school grounds can do for you; A step-by-step process to work through; Advice on how to involve the whole school community in planning changes; Guidance on managing your school grounds project; Practical activity ideas to involve children and adults. This illustrated resource which contains over 140 full colour photos will make it as easy as possible for teachers, parents and school governors to plan and manage a playground improvement project, involving children at the core of the work and linking

the process and improved school grounds to curriculum learning objectives.
