

A Macat analysis of Aristotles Nicomachean Ethics

Aristotle wrote Nicomachean Ethics in Greece in the fourth century B.C.E., a period of extraordinary all-round intellectual development. He was a student of Plato, who in turn was a student of Socrates. Aristotle went on to teach the warrior and empire builder, Alexander the Great. More than two millennia later, Aristotles thorough exploration of virtue, reason, and the ultimate human good still forms the basis of the values that lie at the heart of Western civilization. According to Aristotle, the ultimate human good is eudaimonia, an ancient Greek word that can be translated as happiness, or flourishing. Eudaimonia comes from a life of virtuous (or good) action. Virtues such as justice, restraint, and practical wisdom cannot simply be taughtthey must be developed over time by cultivating virtuous habits. The making of virtuous choices can be developed by using practical wisdom, and by recognizing the desirable middle ground between extremes of human behaviour.
