

Reviews of National Policies for Education Higher Education in Kazakhstan

Reform of education, training and human resource development is an integral part of the transition to a democratic society and a market economy. This book gives a brief overview of regional issues and the history of post-secondary education in Kazakhstan and describes the development of higher and tertiary education in the country since the transition began. It presents an analysis of the education system, identifying key directions for the reinforcement of the reforms in light of the challenges encountered by officials, communities, enterprises, educators, parents and students under very dynamic conditions. It concludes with a set of key recommendations concerning the structure of the system and its labour market relevance; access and equity; financing; governance and management; internationalisation; and research, development and innovation.
