

The Hybrid Project: Genetic Selection & Hybrid Cloning

The Hybrid Project is based on events told by survivor Anna Starfire, a human-hybrid chimera and survivor of military lab experiments. Scientists back engineered technology with help from Advanced Species and subjects like Anna. She describes genetic experiments to improve mind control outcomes on humans and animals. Anna describes the use of special tissues for cloning. She provides the reasons and the bigger picture; the War for Cosmic control. Based on a true life story.
