

## Washington Irving (American Men & Women of Letters)

It is over twenty years since the death of Washington Irving removed that personal presence which is always a powerful, and sometimes the sole, stimulus to the sale of an authors books, and which strongly affects the contemporary judgment of their merits. It is nearly a century since his birth, which was almost coeval with that of the Republic, for it took place the year the British troops evacuated the city of New York, and only a few months before General Washington marched in at the head of the Continental army and took possession of the metropolis. For fifty years Irving charmed and instructed the American people, and was the author who held, on the whole, the first place in their affections. As he was the first to lift American literature into the popular respect of Europe, so for a long time he was the chief representative of the American name in the world of letters. During this period probably no citizen of the Republic, except the Father of his Country, had so wide a reputation as his namesake, Washington Irving.
